North-Holland

Contents Volume 28

1 Editorial
2 Editorial on 'OR Software'
3 Invited Review
Exact methods for the knapsack problem and its generalizations
S. Walukiewicz and K. Dudzinski
22 Differences in bidding strategies (*Case Study*)
M. King and A. Mercer
27 A model for assessing the work processing capabilities of military command and control systems
R.G. Coyle
44 Decision making with incomplete information
M. Weber
58 Job-shop scheduling with resource-time models of operations
J. Grabowski and A. Janiak
74 An experimental comparison of several approaches to the discriminant problem with both qualitative and quantitative variables
E.P. Markowski and C.A. Markowski
79 Pruning of decision alternatives in multiple criteria decision making, based on the UTA method for estimating utilities
T. Stewart
89 A note on a pair of nonlinear mixed integer programming problems
S. Nanda, M.S. Mishra and D. Acharya
93 A non-recursive algorithm for classifying the states of a finite Markov chain
H.J. Weiss
96 Infinite horizon Markov decision processes with unknown or variable discount factors
D.J. White
101 Geometric programming problems with negative degrees of difficulty (*Short Communication*)
S.B. Sinha, A. Biswas and M.P. Biswal
104 EJOR history and geography in figures (*Short Communication*)
W.G.M.M. Rutten and C.B. Tilanus
108 Book Reviews
116 EURO Bulletin

121 Invited Review
Energy models
I. Kavrakoğlu
132 A DSS design framework for competitive strategy formulation (*Case Study*)
M. Oral
146 An application of multi-objective modeling: The case of the Indian sugar industry (*Case Study*)
B. Vijayalakshmi
154 A new points system for soccer leagues: Have expectations been realised? (*Case Study*)
A. Mehrez, A. Mercer and J.S. Pliskin
158 A transient queueing model for Business Office with standy servers (*Case Study*)
S.K. Mok and J.G. Shanthikumar
175 An analysis of advertising and distribution effectiveness (*Case Study*)
K.E. Kioulafas and S.N. Brissimis
180 The applications of OR techniques for the prediction and understanding of damages caused by seismic events (*Case Study*)
L. di Sopra and G. Patrizi
196 A location–allocation problem in a large Belgian brewerey (*Case Study*)
L.F. Gelders, L. Pintelon and L.N. Van Wassenhove
207 A large mixed integer production and distribution program
F. Duran
218 The potential impact of artificial intelligence on the practice of OR
L.C. Hendry
226 A comment on the article 'Inspection and maintenance optimization methods' by K.M. Mjelde (*Short Communication*)
Å. Hallefjord, K. Jörnsten, S. Storøy and S.W. Wallace

0377-2217/87/$3.50 © 1987, Elsevier Science Publishers B.V. (North-Holland)

228 Multi-input multi-output fuzzy systems and the Inverse Problem (*Short Communication*)
C.P. Pappis
231 OR Software
233 Book Reviews
240 EURO Bulletin

247 Invited Review
Decision and risk analysis
H. Moskowitz and D. Bunn
261 Exploring and controlling a bank's interest risk:
Sensitivity analysis of an asset and liability co-ordination model
H. Meyer zu Selhausen
279 The analysis of a single base in an airlift operation
J. Chandra, R. Wasserstein and A. Hogan
286 Pricing strategies for a non-replenishable item under variable demand and inflation
J.A. George
293 A dynamic quantity discount lot size model with resales
K.-I. Sohn and H. Hwang
298 Economic ordering policy for deteriorating items over an infinite time horizon
S.K. Goyal
302 The TTT-concept and replacements to extend system life
B. Bergman and B. Klefsjö
308 Random walk models for search with particular reference to a bounded region
B. Conolly and D. Roberts
321 On the heterogeneous machine interference with limited server's availability
A. Pósafalvi and J. Sztrik
329 An approach for preference ranking of alternatives
Z.Y. Khairullah and S. Zionts
342 Multiple-use land planning and conflict resolution by multiple objective linear programming
F. Glover and F. Martinson
351 A fuzzy preference relation in the vector maximum problem
S. Chanas and B. Florkiewicz
358 Activity optimization games with complementarity
D.M. Topkis
369 Local decomposition methods for linear programming
C. van de Panne
382 Facilities layout generalized model solved by n-boundary shortest path heuristics
J.W. Giffin and L.R. Foulds
392 OR Software
